SUMMARY

I specialize in building modern, user-friendly web applications using React, Next.js, TypeScript, Tailwind CSS and cutting-edge technologies. What sets me apart is my commitment to delivering high-quality code and my ability to translate complex business requirements into elegant solutions. I thrive in collaborative environments and consistently receive praise for my clear communication and problem-solving abilities.

EXPERIENCE

Software Engineer | InvoiceHub Space | Remote | October 2024 - Present
- **Core Technologies:** React, TypeScript, TailwindCSS, ShadCN UI, Context API, Keycloak.
- **Key Contributions:**
  - Built and optimized dynamic, responsive user interfaces using **React** and **ShadCN UI**, ensuring a seamless and visually appealing user experience.
  - Developed robust state management solutions with **Context API**, streamlining data flow across the application.
  - Integrated a complex, large-scale **back-end system**, bridging front-end and back-end operations to deliver a unified platform.
  - Implemented secure **user authentication** and authorization using **Keycloak**, ensuring compliance with modern security standards.
  - Designed and maintained a consistent **UI/UX** using **TailwindCSS**, adhering to brand guidelines and accessibility standards.
  - Spearheaded advanced **caching strategies** to reduce load times and eliminate redundant loading skeletons, enhancing performance and user satisfaction.
- **Impact:**
  Successfully improved application performance, user engagement, and development efficiency by delivering scalable, maintainable solutions and integrating backend processes with front-end workflows.

Wordpress Developer | UpWork | Remote | December 2022 - May 2023
- **Core Skills:** WordPress Development, Elementor, WooCommerce, SEO Optimization, Theme & Plugin Customization.
- **Key Contributions:**
  - Created fully responsive and visually appealing **WordPress websites**, tailored to meet the specific needs of individual clients.
  - Designed and customized layouts using **Elementor**, ensuring intuitive user experiences and adherence to client branding.
  - Integrated and configured **WooCommerce** to deliver seamless e-commerce functionality, including product listings, payment gateways, and inventory management.
  - Enhanced website performance and visibility through **SEO optimization**, improving search engine rankings and organic traffic.
  - Delivered end-to-end solutions by managing domain setups, hosting configurations, and ongoing site maintenance.
- **Impact:**
  Empowered clients to achieve their business goals by delivering high-quality, functional, and search engine-optimized websites.

Bitrix Developer | Georgian Technical University | Tbilisi, Georgia | February 2020 - December 2020
- Utilized the Bitrix system for [specific tasks—e.g., managing CMS, customizing workflows, integrating modules, etc.].

FrontEnd Developer | Georgian Travelguide | Tbilisi, Georgia | January 2020 - May 2020
- Focused on creating clean and efficient markup using HTML, CSS, and JavaScript to enhance the website's structure and visual presentation.
